

Virsage WorkPlace is the culmination of our experience and expertise solving the unique IT requirements of small business. WorkPlace is the most robust and reliable computing platform available for your business.

Never Buy Another Server

Virsage WorkPlace replaces complex and expensive servers with a simple web-based solution for all your business computing needs. WorkPlace is a comprehensive solution that gives you access to your line of business applications, email and files from any PC, Mac, iPad or smart phone.

CONNECTING TO WORKPLACE IS AS EASY AS 1-2-3

1

YOU

Run the WorkPlace icon from your PC, Mac, or smart phone.

2

THE INTERNET

Securely connect to WorkPlace from home, WiFi, or broadband Internet connection.

3

WORKPLACE

Access your applications and your files wherever you need them.

WorkPlace is a comprehensive, managed IT environment. In addition to your data and applications, Virsage provides all the services that traditionally were only available to larger organizations.

VIRSAGE WORKPLACE INCLUDES THE FOLLOWING

- Microsoft Office 2010
- Microsoft Exchange Email
- Daily Backups
- Spam Filter
- Help Desk Support
- SharePoint Services
- Custom Applications
- Web Filtering
- Remote Access
- Web Access
- iPad Compatible
- Security

Moving from your current environment to WorkPlace is simple and quick. The Virsage team will be with you from day one to move your data, applications, and lead you through the migration process.

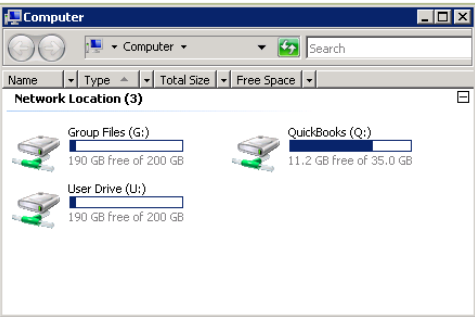

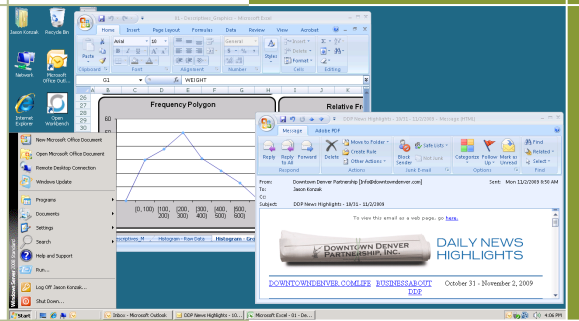

WORK FROM ANY DEVICE

WorkPlace users have an icon right on their desktop, just double click, type in your username and password, and you are securely connected to your files and applications. You can download the icon to any computer over the web.

MORE THAN JUST A 'DESKTOP'

WorkPlace is your managed desktop environment and more. Working with Virsage WorkPlace is exactly like working on any windows desktop computer. Unlike a desktop, your data and applications are safely stored in our data center and managed by the Virsage support team. This ensures a more reliable computing platform, monitored 24x7 free from threats like spyware or hardware failure.

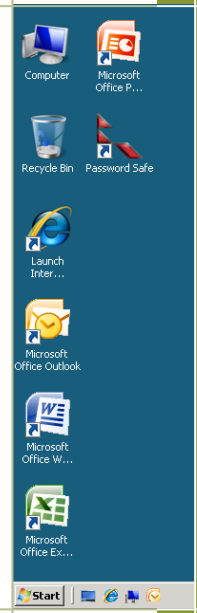

SHARED NETWORK STORAGE

All WorkPlace accounts come with network drives for individual and group access. You can lock down any folders to only those who need access. As your storage needs increase we scale your available storage to meet them.

WORKPLACE IS THE SAME FROM ANYWHERE

Remote access with a traditional desktop or laptop computer is cumbersome and expensive and presents increased risk of data loss or system crashes. Virsage WorkPlace solves these challenges, by providing complete access to both data and applications from any desktop or laptop, with no worries about equipment failures, viruses, spam, or theft.

Most Windows based applications will work with WorkPlace. Virsage will test your business applications for compatibility prior to implementation.
